SKILLS

Front-End: Elm, React/Typescript, AngularJS, HTML5, CSS3, Sass

Back-End: Ruby on Rails, PostgreSQL, NodeJS, Redis, Elasticsearch

Tools: Github, CircleCI, AWS Cloudwatch, Postman, Sentry, Sidekiq, Clickup, Readme.io, Intercom, Amplitude, Loom, Zoom, Slack, Google Suite

Professional: Engineering management and mentorship, technical architecture, project management, product and design collaboration

PROFESSIONAL EXPERIENCE

Rad AI | Senior Software Engineer 09/2025 - Present

Hint Health | Senior Software Engineer II 05/2024 - 08/2025
Technical Lead Manager 10/2022 - 12/2024
Senior Software Engineer I 05/2021 - 10/2022
Software Engineer II 06/2018 - 05/2021

- Interviewed and scaled a team from 2 to 9, including 3 product managers and another TLM. Restructured it into two units after successfully onboarding new hires over 1.5 quarters.
- Organized detailed project plans spanning product, design, engineering, and business deliverables, identifying resource requirements, task owners, milestones, dependencies and potential risks. Consistently delivered roadmap objectives over 7 quarters—despite changing requirements and company priorities—through proactive communications with stakeholders, product scoping, and focused project management and execution.
- Spearheaded and designed the technical architecture for the lift and shift initiative of our faxing product from Documo to Telynx, delivering the project on-time and enabling the company to avoid 10% ARR churn.
- Designed and/or implemented bi-directional external integrations with EMRs (athenahealth, Elation Health) and financial tools (Stripe, Quickbooks Online) that directly enabled over \$1.5M ARR
- Contributed to rewriting and migrating our entire frontend product from AngularJS to Elm, enabling refactors to be implemented 5x faster and reduce runtime errors.
- Member of the Diversity & Inclusion committee, Women's Resource Group, and Parenting Resource group. Led initiatives such as Hintrovert Days to combat employee burnout as well as company-wide personal READMEs, Donut rotations and Social Undistancing hangouts to foster faster remote team connection and onboarding.

Gobble | Software Engineer 12/2016 - 06/2018

- Engineer #2: responsible for our public-facing marketing website, core customer-facing application, internal applications, and A/B growth initiatives.
- Led and implemented a complete redesign of the entire customer-facing website, transactional, and marketing campaign emails with new branding, signup flow, checkout process, and content revisions in four weeks.
- Designed component-based UIs which are used across all different applications for a seamless experience for the entire company. Established code style and best practices for Rails, HTML, and Sass.
- Refactored customer-facing pages from Coffeescript, Backbone, HamL, and CSS into Rails and Sass. This allowed us to scale 3x our customer subscriptions, improve the customer experience, and reduce technical issues across the platform.

Creelio | Digital Marketing Strategist 01/2015 - 05/2016

Hello Fearless | Co-Founder & COO 02/2014 - 12/2014

Hoopla.io | Business Development Lead 08/2013 - 12/2013

Sporting Innovations | Client Results Executive 09/2012 - 08/2013

Magnifi Group | Product Manager 06/2010 - 09/2012

EDUCATION

Hack Reactor | Advanced Software Engineering Immersive 2016

University of California, San Diego | B.S. General Biology, Minor in Communications 2007 - 2011
